

A Note From Dr. Wyler To Our Valued Patients:

We wanted to reach out to all of our patients to let you know how our office is responding to the current COVID-19 pandemic. Our utmost priority is the health of our patients, staff and community. After evaluating the most current information and reviewing published guidelines, we remain confident in our ability to provide dental care in a safe and healthy environment.

We recommend any patient stay home if they are experiencing COVID-19 or flu-like symptoms. We want to limit and reduce person-to-person

exposure in our community, to our patients and to our staff. If you are feeling ill, have a fever, cough or shortness of breath, we kindly ask that you call our office and reschedule your appointment.

If you have an appointment and are feeling healthy, we plan to continue to stay open and see patients as long as guidelines and recommendations permit us to do so. We are closely monitoring updates from the Centers for Disease Control and WHO and will continue to seek guidance from these agencies and local public health officials. With new information, we will make the necessary adjustments to our operations and will keep you informed of any changes.

We will continue to maintain a clean and safe environment and continue to comply with OSHA and CDC infection control guidelines. We have standard protocols in place to disinfect all surfaces and patient contact areas. We have expanded and increased the frequency of cleaning and disinfection of all common areas and facilities. Each patient room will be thoroughly disinfected after each patient.

We also ask that if you have traveled outside of Wisconsin in the last two weeks, alert our staff prior to your appointment. If you have traveled or have returned from a cruise, we may ask you to reschedule.

For more information, questions or to reschedule an appointment, please call our office at (262) 784-5757.

Sincerely,
Dr. Wyler and Team
